| <p>I was a ESM tech, worked for Jack (E-Z) Faris and with H. H. (hotwaternobber) Watanabe (who had more time as a 1rst class ET(ss) than anyone in the history of the USN), Robert A. (stumper) Stump, Bobby Brown, Steve (insane) Sanner, Tommy (little Tommy) Coyle, Tim Plumb, two naviguessers LCDR (Flaky)Gentile, and LCDR (Reese has gone nuts) Reese. Nav ET's were Vic (Vic Vic the derelik) Decarlo, Michael Ray (Michael Vicscogin) Herrin, Vincent Vincenti, Tim Valenta. Man I'm laughing right now remembering you guys.</p> <p>I can't belive Lucero is a doctor, probably a gynecologist.</p> <p>I remember we called the ST's snivel techs because they were always sniveling about something when they weren't wasting water in the shower. Ensign (pigs in space) Link. CO captain Lackowitz.</p> <p>Great web-site, neat memories.</p> <p>Sailor Rest Your oar: Please include TM2(ss) Bruce Gray. Bruce died while Puffer was in Bremerton for a core change in &#39;78. Bruce road a Honda CB400 into a mailbox.</p> <p>I accompanied his remains to his home in Buffalo NY for burial.</p> <p>Bruce was a great friend and shipmate</p> | | | | | | |
